

## REMARKS

### Priority Document

The Priority Document was submitted at the time of filing. A copy of the return receipt postcard and the official cover sheet are included. The Applicant submits that an official copy of the priority document has been submitted to the commissioner.

### Office Action

The Examiner is thanked for the Office Action dated October 6, 2003. The Office Action has been carefully considered and the Applicants have the following remarks. Claims 1-18 are pending in this application.

Claim 1 has been amended to include the features recited in former claims 4 and 5. Claims 3 and 11 have been amended to correct informality problems, discovered by the Applicants during review of this application, and to avoid claiming "the sliding channel of the frame." Claim 12 has been amended to correct typographic errors and for clarification purposes only. New claims 16-18 have been added in order to further protect the invention under an alternate claim scope. It is fully believed that no new matter has been added.

The Examiner stated that claims 9-15 are allowable, and that claim 5 would be allowable if rewritten into independent form including all the features of the independent base claim 1. Applicants have cancelled claims 4 and 5 incorporated the features recited in these claims into claim 1. Thus, it is respectfully submitted that claim 1, as amended, is in condition for allowance. The Applicants expressly reserve the right to claim the original scope of claim 5 in this or a continuing application.

Claims 1-4, 6, and 7 stand rejected under 35 U.S.C. §102(b) as being anticipated by Nakamura et al (U.S. Patent No. 4,111,533). Claim 8 stands rejected under 35 U.S.C. §103(a) as being unpatentable by Nakamura et al. However, it is respectfully submitted that claim 1 has been placed in allowable condition by incorporation of the limitations recited in canceled claims 4 and 5. In view of the cancellation of claims 4 and 5, it is respectfully submitted that the rejection of claim 4 is moot. Accordingly, it is respectfully submitted claims 2, 3, and 6-8 are allowable at least because of their direct dependence from allowable claim 1, and that the rejections of claims 1-3 and 6-8 be withdrawn. The

Applicants respectfully reserve the right to address the §102(b) and 103(a) rejections in a continuing application as they are not presented here due to mootness.

Claims 16-18 have been added in order to further protect the invention under different scope. The limitations added to claims 1 and 9 should not be imputed to further narrow the claim scope of claims 16-18. New independent claim 16 is supported by pages 4-6 of the Specification and FIG. 2. Claims 17 and 18 are dependent upon claim 16 and are supported by pages 4-6 of the Specification and FIG. 2. No new matter has been added

#### CONCLUSION

For the above-stated reasons, it is respectfully submitted that this Amendment and remarks places the application in condition for allowance. A Notice of Allowance is earnestly requested. Should the Examiner feel that a conference would be helpful in expediting the prosecution of this application, the Examiner is hereby invited to contact the undersigned counsel to arrange for such an interview.

Respectfully submitted,
